## CITIZEN'S ADVISORY COMMITTEE

Meeting Date: December 7, 2021

### CALL TO ORDER:

Chair Cendejas called the meeting to order at 6:30 PM.

### DISCUSSION:

David Kaitz with Davis Demographics presented the current district map. He explained that he is using the 2020 populations counts to bring each district into compliance. He prepared 2 initial scenarios and presented each one.

Map 1: Kaitz talked about what shifts have taken place in order to make the districts compliant and along with this he presented the breakdown of the demographics in each district.

Commissioner Cendejas asked if the council district boundaries aligned with the school district. Kaitz stated that they are different.

Map 2: Kaitz shared that there were less changes/shifts made, but the districts were still compliant. He explained that he made different changes from Map 1 to show what can be done to be compliant, just in a different form.

Commissioner Conklin asked if growth is taken into consideration.

City Attorney, David Yanez said it can be taken into account, but there is a priority list that needs to be taken into account first.

Kaitz added that other scenarios can be drawn up, but we need to make sure the districts are still compliant.

Assistant City manager, Daniel James asked Kaitz if he is looking for some direction or suggestions in regards to the maps presented.

Kaitz stated this is the time to discuss, but the Commission can also review and bring back suggestions at a later date or they can let staff know.

Cendejas asked what the time frame is.

James said the deadline is April 17<sup>th</sup> and the map chosen in the next meeting will be what is presented to Council.

---

There was continued discussion in regards to growth in the different districts and whether or not that should be considered when redrawing the districts.

Kaitz said he can create an interactive map and manipulate it based on suggestions so that the Commission can see, live, how the boundaries change based on different growth.

James will get Kaitz a map showing all the planned units in the next 5 years so that Kaitz can create an overlay showing the growth in the districts.

Kaitz stated that he can have the overlays ready for the next meeting.

**Discussion ended 7:09 PM**
